provider (HCP)

If you choose this box, mark 2A OR 2B below.

2A) □ Signed note from HCP attached OR

2B) □ HCP sign here and print name below:

| Licensed healthcare provider signature | Date |
|--|------|
| (MD, DO, ND, PA, ARNP) | |

Printed Name:

3) ☐ Chickenpox disease verified by school staff from the Immunization Information System

If the child can show immunity by blood test (titer) and hasn't had the vaccine, ask your HCP to fill in this box.

Documentation of Disease Immunity

I certify that the child named on this CIS has laboratory evidence of immunity (titer) to the diseases marked.

Signed lab report(s) MUST also be attached

| 0000 | Diphtheria Hepatitis A Hepatitis B Hib Measles | Mumps Polio Rubella Tetanus Varicella | | Other: | |
|------|--|---|------|--------|------|
| | ensed healtho | | gnat | ure | Date |

Printed Name:

Instructions for completing the Certificate of Immunization Status (CIS): printing it from the Immunization Information System (IIS) or filling it in by hand.

- #1 To print with information filled in: First, ask if your healthcare provider's office puts vaccination history into the WA Immunization Information System (Washington's statewide database). If they do, ask them to print the CIS from the IIS and your child's information will fill in automatically.

 Be sure to review all the information, sign and date the CIS, and return it to school or child care. If your provider's office does not use the IIS, ask for a copy of your child's vaccine record so you can fill it in by hand using steps #2-7 (below):

 EXAMPLE
- **#2 To fill in by hand:** Print your child's name, birthdate, sex, and your own name in the top box.
- #3 Write each vaccine your child received under the correct disease. Write the vaccine type under the "Vaccine" column and the date each dose was received in the "Month," "Day," and "Year" columns (as mm/dd/yyyy). For example, if DTaP was received Jan 12, March 20, June 1, '11, fill in as shown here
- **#4** If your child receives a combination vaccine (one shot that protects against several diseases), use the Reference Guide below to record each vaccine correctly. For example, record Pediarix under Diphtheria, Tetanus, Pertussis as **DTaP**, Hepatitis B as **Hep B**, and Polio as **IPV**.

| Vaccine | Dose | | Date | , |
|-----------|-----------|------------|-----------|--------------|
| Vaccine | Dose | Month | Day | Year |
| ◆ Diphthe | ria, Teta | nus, Pertu | ssis (DTa | aP, DTP, DT) |
| DTaP | 1 | 01 | 12 | 2011 |
| DTaP | 2 | 03 | 20 | 2011 |
| DTaP | 3 | 06 | 01 | 2011 |

- #5 If your child had chickenpox (varicella) disease and not the vaccine, use only one of these three options to record this on the CIS:
 - 1) If your child's CIS is printed directly from the IIS (by your healthcare provider or school), and disease verification is found, box 1 is automatically marked. To be valid, this box must be marked by the IIS printout (not by hand).
 - 2) □ If your healthcare provider can verify that your child had chickenpox, mark box 2. Then mark either 2A to attach a signed note from your provider, or 2B if your provider signs and dates in the space provided. Be sure your provider's full name is also printed.
 - 3) 🗆 If school staff access the IIS and see verification that your child had chickenpox, they will mark box 3.
- **#6** Documentation of Disease Immunity: If your child can show immunity by blood test (titer) and has not had the vaccine, have your healthcare provider fill in this box. Ask your provider to mark the disease(s), sign, date, print his or her name in the space provided, and **attach signed lab reports**.
- #7 Be sure to sign and date the CIS, and return to the school or child care.
